

Acknowledgements

To our interviewees, who trusted us with their stories.

To the South St. Boniface Residents Association and Point Douglas Residents Association, whose foundational work made our project possible. Special thanks to Gary Tessier, Sandra Dupuis, Teresa Cwik, and Madeleine Vrignon.

Glen Koroluk, for steering the Manitoba Eco-Network bravely forward.

Sarah Cooper, for their endless patience and support with getting the ethics protocol submitted, resubmitted, and approved, as well as providing calm support and great questions for the report production process.

Heather Fast, for her tireless enthusiasm and passion for using the law to protect the environment and shepherding student researchers.

Folarin Solademi, for writing a powerful thesis project about contamination in St. Boniface neighbourhoods and generously creating GIS maps to help us tell the story of our research.

Merci to H  l  ne Bilodeau for translating our Executive Summary.

Pro bono students Prachi Sanghavi, Alyssa Thomas, and Ryan Hall, Environmental Law Group students Julia Beal, Jenny Bi, Brenden Drews, Jenna Jeffrey, Nicholas Mark, Kerith Tung, and independent researcher Shaylyn Pelikys for giving their time to this project to learn how to do legal research. Thanks to Katrine Dilay and again to Heather Fast for providing student support.

The Advisory Committee, consisting of Michelle Berger, Jennifer Chen, Sarah Cooper, Catherine Flynn, Dr. Jon Gerrard, Sande Harlos, Guy Jourdain, Malaya Marcelino, Lea Mutch, Greg Selinger, Shirley Thompson, Christine Trickey, Byron Williams. We appreciate their time commitment and willingness to provide personal stories and guidance.

Finally, big thanks to the Manitoba Research Alliance (MRA) and the Manitoba Law Foundation (MLF) for their generous funding support. Without these resources, this project could not have happened. We aspire for all environmental justice projects to be funded and supported as we have been, which will enable meaningful change and healing for all who share this land.
